Claims 1-4, 7-8, 12-13 are now pending.

Drawings

1. The new drawing sheet was received on 1/18/05. This drawing is acceptable.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) FIG. 2;

(2) FIG. 3;

(3) FIG. 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic to all species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. During a telephone conversation with Michael E. Noe, Jr. on 6/22/05 a provisional election was made without traverse to prosecute the invention of Species III, claims 1-4, 7. Affirmation of this election must be made by applicant in replying to this Office action. Claims 8, 12, 13 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Quayle Action

5. This application is in condition for allowance except for the following formal matters:

Drawings

a. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "coating is located

on and completely encases the entire pocket of the top surface of the supporting structure,” as recited in claim 2, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

- b. Claims 2-4 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper

Art Unit: 2652

dependent form, or rewrite the claim(s) in independent form. (a) In the claims (3 & 4), since claim 1 sets forth “a coating *on the entire top surface* of the supporting structure other than the air bearing surface,” (emphasis added by Examiner) it would follow that this language would already encompass “the coating is located on each of the corners of the top surface of the supporting structure” (as recited in claim 3) and “the coating is located along and completely coats an entire length of the lateral edges of the top surface of the supporting structure.” (as recited in claim 4); (b) claim 2 is objected to since the top surface of the pocket already includes the coating, it is not apparent how the language “encases” could further limit the claim.

2. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

REASONS FOR ALLOWANCE

3. The following is an examiner’s statement of reasons for allowance: the prior art of record does not teach nor reasonably suggest a slider for a disk drive having a coating on *the entire top surface* of the supporting structure *other than the air bearing surfaces* (ABS) of the protrusions, such that the ABS *are completely free of the coating*; wherein the coating is formed from a *material that is softer* than the supporting structure.
